Alfa Romeo Giulietta Spider Veloce 1960 LHD If one classic car should be catalogued as playful and sexy, it surely is the Alfa Romeo Giulietta Spider Veloce! Have a look at the photos I took this afternoon of my very recently acquired Giulietta and I am quite sure you will agree. Moreover, you did not even test drive this Italian beauty...! From the certification letter obtained from the Centro Documentazione Alfa Romeo, it is clear that this example with chassis number AR 1495.09912, is a genuine Veloce Spider of which only 2.796 examples were produced. Thanks to twin choke Weber carburettors and higher profile camshafts the correct AR 000106 Veloce-engine produces 90 PS instead of the 80 PS for the standard Giulietta. Automatically the top speed climbs to 185 Km/h instead of the standard 165 Km/h. Originally delivered new to Frankfurt - Germany in sky blue, this Giulietta Spider Veloce however was sold to a first owner in Holland who immediately changed the colour into gleaming black, which, according to me, suits this Spider perfectly. This Giulietta Spider Veloce remained all her life in Holland and recently (2013) benefited from a complete overhaul by well reputed Alfa Romeo specialists. This thorough job is very well documented with many photographs and invoices. The colour combination of a perfectly gleaming black body with dark red leather upholstery + a new black double duck hood just looks super. I had this afternoon a nice drive around our home town Aalst in this Giulietta and must confess I immediately had the feeling as if I was on holiday. OK, this late September nice sunny weather added to it, but the Alfa Romeo did all the rest. Would not you love to experience such holiday feeling all year long? Well, here is your chance with this very nice, playful and sexy Giulietta!

Brand	Alfa Romeo
Model	Giulietta Spider Veloce
Year	1960
