Alvis Speed 20 Tourer

1932

Gallery

Very early SA model with flat radiator. Only a handful "flat radiators" speed 20 models were built ! One of the nicest and most practical Cross & Ellis coachbuilt tourers. This beautiful Alvis Speed 20 is now for the 3rd time back with me ! Such an excellent car with magnificent looks is allways wellcome in my stable. When she arrived for the first time, she allready was a beauty and I assure you now 10 years laters, she still is and became on the mechanical side even better, because a previous German owner had the engine completely rebuild and last time French owner took care of the gearbox and rear axle. Super straight bodywork looking very sexy in British Racing Green. Perfectly complemented by gorgeous green leather upholstery. Best quality double duck hood, tonneau cover, hood bag and side screens. Believe me the looks are not let down on the road! A super car ! I had many Alvis Speed cars with different engine sizes and with all sorts of coachwork, but this one is certainly amongst the nicest Alvis Speed cars I came across in my long classic car life. Super quality and provenance for an unrepeatable price.

Brand	Alvis
Model	Speed 20 Tourer
Year	1932
Steering	Right (RHD)
