Aston Martin DB2/4 MKII Convertible

1957

Gallery

Chassis : AM 300/1281 My classic car friends will have noticed that quite a few of the only 98 ever produced DB 2/4 convertibles have passed through my hands. I am therefore very proud to present you the next one in this row : a very attractive MKII convertible. The very close to concours exterior presentation in light metallic blue paint finish, hides a perfectly sound aluminium body skin on a super sound structural subframe and chassis. The blue leather upholstery shows just a little bit of lovely patina. The dark blue mohair hood, which is still in perfect trim, complements the exterior and interior colour combination perfectly. The sparkling chrome wire wheels are a nice quality level finishing touch on this rare open Aston Martin. The mechanical excellent condition is illustrated by the fact that this DB 2/4 was registered as a normal car in Belgium and passed without any problem every year the rather severe "Controle Technique" test. My specialised classic car workshop will make sure this exclusive Aston Martin is in tip top condition for a lot of summer fun before she ends up with her new owner. Could this be you ?

Brand	Aston Martin
Model	DB2/4 MKII Convertible
Year	1957
Steering	Right (RHD)
