Aston Martin DB2/4 MKII Coupé

1956

Gallery

Chassis n° : AM300 1108 This Aston Martin has acquired over the years a special place in my heart. I will tell you why. I could buy this Aston Martin sports Coupé approx. 10 years ago from a doctor living in the east-part of Belgium. The pleasing lines of the MKII combined with the attraction of the interior in original leather represented the initial sparkle why I became in a way 'hooked' onto this sports car. While the Aston Martin was in our care we undertook in successive stages the full restoration of the body and the mechanics. Because the owner allowed us to work according to our standards and over the years build-up experience in these Aston Martin models, in the end this Aston Martin became the 'black beauty', you discover here, but also kept all her initial charm. Let me show you this Aston Martin DB2/4 MKII Coupé in the flesh and in details and you will understand why I am proud and happy to have this sports car back into my classic car stable. The smooth and powerful 3 liter 6 cylinder engine did add-up only a couple of thousand Kms since the complete rebuild and demonstrates, while driving this Aston Martin on the road, lots of punch and good health. The for this MKII model correct bucket seats, in charming original mid-blue leather, offer good comfort and allow a perfect driving position (which is not the same in a DB2 or even in the MKI). These 50-ies Aston Martins are, in my opinion, still underrated in comparison with the later DB4, 5 and 6-es. From the design point of view they are, according to me, state of the art on chassis concept, body structure construction, body design and mechanical development. And this particular DB 2/4 was fully sorted exactly as how we like them to be.

Brand	Aston Martin
Model	DB2/4 MKII Coupé
Year	1956
Steering	Right (RHD)
