Austin Healey 100/4 Factory M

1956

Gallery

This particular Austin Healey rarity is one of the many big Healey's which went through our hands during our 20 years of activity as a classic car specialist. With our vast experience in the make, our feeling was always that the 100/4 model was the purest design not only esthetically but also from the mechanical concept point of view. In this range the Factory produced M or 'Le Mans' specification Healey is certainly the most sought after 100/4. We checked all the numbers on chassis, body panels and mechanical components and could conclude this Austin Healey 100/4 sportscar is a matching numbers BN2 Factory M. Approx. 15 years ago we restored this sportscar from bumper to bumper for the at that time lucky owner. We were allowed to do so without too much financial restrictions and could thus execute a nut and bolt restoration respecting in detail the original specifications and color combination of this factory produced M. Even better, during the last 15 years we could very closely follow-up her condition, because we presented year after year this Austin Healey to the Belgian 'Contra'le Technique' and noticed that every time she had covered only a few 100-s of Km. So, this Healey still looks as if she came fresh out of our restoration workshop. Approximately 2.000 Km further the actual owner has now decided to sell.

Brand	Austin Healey
Model	100/4 Factory M
Year	1956
Steering	Left (LHD)
