Austin Healey 3000 MKIII

1966

Gallery

Very presentable big Healey. This last series is sought after because of the more comfortable wrap around windscreen, wind-up windows and easy to erect and fold down hood system. These BJ8's had also the most powerful 6 cylinder, 3 liter engine (150 HP). Although the paint job dates from about 15 years ago, the presentation is still nice in british racing green and evenso attractive is the black interior. In our workshop, which has a great experience in Healey's, we reconditionned not so long ago, the engine completely, fitted a new stainless steel exhaust and treated this sportscar on a set of brand new wire wheels + hubs and Avon tyres. Chassis and body are absolutely corrosion free because this car came initially from California. With some tender loving care, this BJ8 Healey could be a great classic and your pride and joy. Yours for an affordable 30.000 euro

Brand	Austin Healey
Model	3000 MKIII
Year	1966
Steering	Left (LHD)
