Ferrari 328 GTS

1986

Gallery

Ferrari 328 GTS 1986 LHD The mid-engined Ferrari 328 was certainly one of the best selling models in the Ferrari history and was considered as one of the top-sportscars of that era. Perfect roadholding and a very healthy power output (270 BHP) from the reliable V8 3,2 liter engine provided sensational driving pleasures. The elegant design was already in the 80-ies appreciated as very striking, and today considered as one of the Pininfarina masterpieces. This particular GTS version with "Targa-roof" was originally sold new in Italy before a well reputed Belgian classic sportscar collector bought this grey-blue metallic beauty. Inspecting this Ferrari closeby reveals immediately how well maintained she was by her successive Italian and Belgian owner. Proof of the sportscar's excellent quality is the fact that she is registered in Belgium as a normal car; not as an oldtimer, and thus has to pass the annual rather severe technical inspection just as any other modern car. In conclusion: A genuine supercar which could give you driving pleasures every day!

Brand	Ferrari
Model	328 GTS
Year	1986
