Ferrari Dino 246 GT 1973 LHD If one had to select the most beautiful car design on production cars from our automobile heritage I think many of us would choose the Ferrari Dino 246GT. It is true that from any angle you observe this Dino, the shapes are always just perfect! With this model Pininfarina has created a masterpiece of car design. The mechanical lay-out developped by Ferrari's son Dino is evenso a technological masterpiece. A just behind the seats of driver and passenger mounted compact 2,4 liter V6 with 4 overhead cams gives perfect balance and go-cart sensations to this elegant sportscar. We bought this French ex-Pozzi Ferrari Dino a couple of years ago from the 3-rd owner. At that time this Dino had covered only 91.000 Km from new and had just benefitted at 80.000 Km from a full engine rebuild. One of our very loyal customers asked us to sort out this 246GT completely including stripping the whole body of this Dino to bare metal and paint her in the bright "Ferrari Giallo" and refurbish the whole interior. At the same time new wheels and tyres were fitted. We also made sure the chassis and whole underneath were in perfect condition. After this restoration the Dino attracted a lot of admirative looks from our customers but was very rarely fired-up and driven. Because of this our customer asked us to sell this 246GT Dino to finance other interesting restoration projects which we are taken care off in our workshop for him.

Brand	Ferrari
Model	Dino 246 GT
Year	1973
Steering	Left (LHD)
