Fiat 8V Elaborato Zagato - chassis 109

1954

Gallery

Of the only 114 Ottovu's built, I am very proud being able to offer a second extremely exceptional 8V on the market. Chassis 109 left initially the factory with the standard Rapi body. In 1956 this chassis was coachbuilt once again, this time with a unique double bublle Zagato body. In 1957, the car was again slightly modified by Zagato with stylish side vents. These successive modifications turned this car into a unique "Elaborato" Zagato. From 1955 until 1958, this Ottovu had a very active competition life which is very well listed into the smallest details by my fellow countryman Tony Adriaensen in his very recent and splendid Ottovu book. From 1958 onwards, this car remained practically untouched, which results now in 2005 with a totally original 8V having a unique Zagato body, with only 29.000 km from new ! This time wrap and very attractive double bubble Zagato Ottovu would be the perfect, very exclusive addition into anyones select classic car collection. Yours ?

Brand	Fiat
Model	8V Elaborato Zagato - chassis 109
Year	1954
Steering	Left (LHD)
