Fiat Dino Spider 2000

1968

Gallery

This sportscar is a very interesting thoroughbred Ferrari sister which has a little bit been forgotten by Italian exotic car collectors. A pleasant opportunity for amateurs of Italian sportscars to buy a real technical beauty at a minimal price. This Dino was completely restored by a main Fiat/Alfa Romeo/Lancia agent for his own son. Although the restoration was executed already a while ago, this Dino Spider still looks absolutely super. The Ferrari hart of this Fiat Spider is the state of the art full aluminium 2 liter V6 with 4 overhead cams and fed by 2 double Weber carburettors, exactly the same engine as was fitted in the Ferrari Dino 206. Other goodies are a smooth 5-speed gearbox, 4 disc brakes, etc... Beautifully presented in the typical Italian racing rosso high quality paint finish, combined with unmarked black vinyl/tissue interior, the much appreciated wooden dashboard + full set of stylish Velglia instruments, centre lock alloy, cromodora wheels, perfect mohair hood and the typical vinyl covered + big transvers alu strip hard-top, this Fiat Dino is hard to fault. I have not often been able to offer such a superb Italian spider at minimal money of only 57.500 euro in my classic car career. I am sure, quite some Italian sportscar enthusiasts will agree with me !

Brand	Fiat
Model	Dino Spider 2000
Year	1968
Steering	Left (LHD)
