Jaguar E-type S1 1/2 Roadster

1967

Gallery

I spotted this E-type already a while ago in the possession of a Dutch classic car enthusiast. The fact which attracted me most was the beautifully patinated original red leather interior due to the fact that this Jaguar had only covered 33.000 miles from new. Looking closer to this sports car into the smallest details confirmed the very low original mileage convincingly. Also the road test impressed. Super smooth engine, silk gearbox manipulation, very homogeneous sensation and no rattles what so ever. When you add to this sheltered previous provenance the perfect looks of this sports car enhanced by the stylish factory hard-top in black making a very nice contrast to the gun metal grey bodycolor, everyone can understand this particular Jaguar E-type is difficult to resist. That is why she was sold in just a couple of days time.

Brand	Jaguar
Model	E-type S1 1/2 Roadster
Year	1967
Steering	Left (LHD)
