V12, convertible, LHD, manual What better classic Jaguar to drive than this E-type V12 convertible ? Sold new in France to a Jaguar enthusiast living on the Mediteranean isle of Corsica, this E-type has covered only 34.000 km since new ! This totally original car is still in pristine condition. The warm and dry climate of Corsica and the very low milage covered after all those years, guarantee the super original and totally unspoiled condition of this particular E-type. The beautiful old English white paint is attractively complemented by the perfect black leather interior. This low milage V12 E-type is a very performant and relaxed Jaguar to drive. With the sought after 4 speed manual gearbox, the driver can either enjoy the full acceleration range provided by the "state of art" V12 5.3 liter engine or cruise alongside the charming Routes Nationales benefitting from the huge torque of this top range Jaguar power unit. An exceptional E-type at a very realistic 58.000 euro.
