Jaguar XK140 C-type Roadster 1956 LHD Here is a Jaguar XK everybody would like to own! Indeed this XK 140 C-type Roadster combines all the strong points from the complete XK production: - the very pure, sleek design of the 120 Roadster - the much more spacious driving position of the later XK models. - the glorious C-type engine which proved convincingly her supremacy at Le Mans. - over-drive on 4-th gear for more relaxed touring. - clever brake upgrade by fitting the disc brakes of the XK150 together with a servo assistance unit. Coopercraft 4-pot calipers in front and enlarged piston set for rear calipers. - installation of electric waterradiator fan and oil cooler unit for more efficient cooling. - installation of an alternator for better battery charging. - very classic and pleasing color combination of British Racing Green body color with black leather interior and trim. - sparkling chrome wire wheels with comfortable Michelin X radial tyres. This matching numbers XK benefitted from a frame-off restoration approx. 25 years ago. Sparingly used, very well maintained and still in very attractive condition. Comes with French registration documents and a Jaguar Heritage Certificate.
