## Lancia Aurelia B24 Convertible

1955

---

Gallery

Chassis : 1424 The B24 is the most highly valued of all postwar Lancia's. Possessing advanced engineering, elegant style and superbly entertaining road characteristics, these are truly complete collectors cars. Compared to the uncompromising and rare (240ex) Spider, the convertible was slightly more successful with just 521 built and offering a more relaxed and user-friendly drive than the raw Spider. This B24 Convertible which was bought by us in the process of a total restauration, is certainly worth the effort to complete,which our specialised classic car workshop would happily do for the future owner because the values of these Lancia's have risen spectacularly during the last year. Available as such at a reasonable 150.000 euro, this handsome B24 Convertible with lots of potential, will surely be considered by the discerning collectors as "well bought".

Brand	Lancia
Model	Aurelia B24 Convertible
Year	1955
Steering	Left (LHD)
