Lancia Aurelia B24 Spider America

1955

Gallery

I am very proud to be able to offer for sale yet another Lancia Aurelia B24 Spider 'America'. As can be seen from the photos, this Spider (chassis 1028) is in absolute super condition. The more this sexy Lancia sportscar has all the extra's a collector would dream of. From the 240 produced, a minority were produced in RHD (according to real Lancia enthusiasts until 1955 a Lancia should be RHD) and generally destined for the European market (Speedo in Km.!) because the more numerous LHD models went mostly to the USA. The photo of the very clean engine bay (chassis and engine numbers are matching) shows clearly this B24 Aurelia is fitted with the sought after Nardi carburettor kit. Also super is the fact that this B24 Spider is fitted with Borrani wire-wheels and the very rare Carrozzeria Fontana hard-top. The history of chassis 'B24 1028' is cristal clear and well documented. Although being professionally restored (nut and bolt!) in the 80-ies by the well reputed Lancia specialists KCA from Milano, this Spider has hardly been driven since (3.000 Km.). All those years this B24 Spider has been properly maintained by the classic car specialist Clerici in Como. Although these Spiders are very rare, this is the 5-th Lancia Aurelia B24 Spider 'America' I am offering for sale in a little bit more than 1 year (I am sure this must be qualified as some sort of world-record!). From experience I know that these Italian sportscars are 'hot' collectors items. So, if you are interested don't waste time and contact me asap or you might be disappointed...

Brand	Lancia
Model	Aurelia B24 Spider America
Year	1955
