Lancia Aurelia B24S America Spider

1955

Gallery

Chassis : B24S 1061 One of the hottest sportscars on the classic car market at the moment is certainly this Lancia B24S Spider "America". The reason why is because this Lancia sportscar combines beauty (by Pininfarina) with for its time a revolutionary technical concept and rarity (only 240 ex.) all together in one car ! Early this year, I sold 3 America Spiders in a row, each in just a couple of days time. This Spider has now just come back to me in a part exchange with my customer in another top quality classic car deal. I am happy, I have this matching nrs beauty back in my classic car stable. I am sure she will not be there for long...
