Lancia Flaminia GTL Touring Coupé

1964

Gallery

This Flaminia is a splendid alternative to the traditional classic saloon cars such as for instance the Jaguar MKII. We totally restored this for its time high tech Lancia approx. 5 years ago. We were very impressed by its modern concept and exquisite build quality. The clever transaxle layout gives this Flaminia a perfect 50/50 weight distribution, the 2.8 L V6 engine smooth an ample power. All this makes this top range Lancia, a real pleasure to drive. The very airy aluminium coachwork by Touring is the practical 2+2 GTL variant which offers seating accomodation for 2 adults and 2 children. The original green/grey metallic paint, suits this type of bodystyle very well. The black leather upholstery looks still brand new. Inspecting this beautiful Lancia Flaminia will immediately convince any prospective buyer that the 27.000 euro asked for the car, is very reasonable considering the obvious high restoration costs.

Brand	Lancia
Model	Flaminia GTL Touring Coupé
Year	1964
Steering	Left (LHD)
