MG TF

1955

Gallery

- SOLD -

I discovered this MG TF in a derelict private garage in one of the residential area's of Brussels approx 7-8 years ago. This original Belgian MG had been in the same ownership of a sportscar enthusiast for nearly 40 years! When we towed this TF after years of immobilisation back into the daylight, I was impressed by the originality and structural soundness of this MG TF. A perfect restoration project. My good friend Jacky, who is a talented engineer, thought it was the ideal project for him to concentrate on during his retirement. Looking at the car now after years of patient dedication to his restoration project, I can assure anyone: he did a marvellous job! Nut and bolt restored into the smallest details, respecting rigorously the authenticity - confirmed by a 'Heritage Certificate' - of this MG, this TF turns out to be a stunning beauty. Impossible to point-out on this typical 50-ies sportscar an element that wasn't taken care of. Chassis, body, paint-work, brightwork, trim, dashboard, all mechanical components, all electrical components, full suspension, complete brake-system, etc, etc... Absolutely everything is or looks NEW! This matching numbers MG TF, sold new in Belgium in 1955, looks the full 100% the same as when this sportscar was presented 54 years ago to her 1st owner. The original colour combination of dark green metallic with olive-green trim,suits this TF marvellously well. Our classic car team took pleasure in following-up the restoration, Jacky very much enjoyed doing the job, but the lucky one will be the new owner of this superb TF.

Brand	MG
Model	TF
Year	1955
Steering	Left (LHD)
