AC Bristol Aceca

1959

Galerie

To me this is the perfect "British Berlinetta" ! Good size and well proportioned. Togeiro designed tubular chassis covered with light aluminium body panels. The Bristol 6 cylinder from BMW origine provides just the right power for this intelligently constructed car. Extra long legs are provided by the standard fitted overdrive box. Attractively finished in sage green with matching green leather slightly patinated interior. Beautiful walnut veneer dashboard and all correct instruments. Matching numbers car initially restored in the USA, where this sportscar lived all her life in the dry state of California. My specialised workshop undertook a complete suspension and chassis restoration for the previous French owner, who wanted above all a top-quality sportsCoupé. He did not object to spend therefor the necessary money. The excellent result is obvious when you admire these photographs. It will only be confirmed when you come and test drive this "British Berlinetta".

Marque	AC
Modèle	Bristol Aceca
Année de construction	1959
Volant	Droite (RHD)
