AC Bristol Roadster

1956

Galerie

Chassis : BEX 211 Engine : 100D 533 (matching !) Being able to secure this AC Bristol for my stock was a real pleasure for me ! From the pictures, it is not immediately clear, but come and have a look at this charming car in my classic car workshop because this AC is in an amazing original condition. Extremely sound chassis (super straight & undamaged) and corrosion free aluminium body. Nicely aged white paint. Original blue leather upholstery with fantastic patina ! Matching trim on dashboard with all original (and fully functional) instruments. This "time-wrap" AC is in excellent working order. With very enjoyable 6 cylinder Bristol engine showing, even when hot, a healthy oil pressure. Smooth shifting gearbox, precise steering, very efficient brakes, excellent suspension set up. On the road, this AC behaves with an excellent homogeneous feeling, offering good performances and no rattles at all ! Looking at her is a pleasure, because of her fantastic original presentation but driving her on the road is a quite different sensation, because she behaves so well mannered ! With this AC comes an excellent condition full weather equipment (side screens, original hood frame, black vinyl hood and tonneau cover). A well kept voluminous documentation file with records going back to the seventies (last owner nearly 30 years !) confirms the honest provenance of this sought after British sportscar. An excellent buy !

Marque	AC
Modèle	Bristol Roadster
Année de construction	1956
