Alfa Romeo GTA 1600

1965

Galerie

What a luck I had to be able to find this thoroughbred competition car ! Connoisseurs know that these full aluminium bodied super light Alfa's were winners on the track, sprints, rallies, etc... in the mid sixties. The 1600 GTA with her powerful twin spark all aluminium twin cam engine, being the one every historic competition enthusiast is looking to buy. This particular GTA had a nice period competition history in the north of France and south of Belgium. Her very attractive presentation showing clearly the originality of the model and her past autosport life, give this competition Alfa an undeniable "real" and sexy status. The many period competition modifications such as the period bucket seats, twin set of competition wheels (1 set in magnesium + 1 set in aluminium), improved rear axle set up, enlarged competition fuel tank, etc... make this GTA even more interesting. Coming with a well documented and charming race history, full FIA passport going back to the early 80-ies and actual Belgian registration documents, illustrate the crystal-clear provenance of this GTA. This "wet-dream" of every motorsport enthusiast is offered by me here at a "peanut" purchase price

Marque	Alfa Romeo
Modèle	GTA 1600
Année de construction	1965
Volant	Gauche (LHD)
