Aston Martin DB2/4 Coupé

1955

Galerie

This LHD Aston Martin DB2/4 Coupé was initially sold to Canada. This sportcar with chassis nr LML953 came back to Europe with the intention to be restored to former glory. From the Factory Build Sheet, this Aston left the factory on 20-05-1955 : in the attractive colour combination of Sea Green with beige interior trim. This colour is indeed visible under the actual dull red paint. At the moment totally dismantled, but apparently totally complete, this Aston Martin shows clearly to be a worthwhile project. Very sound chassis and generally beautiful aluminium skin. From experience I know it has become very difficult to find such attractive Aston Martin projects in LHD because relatively very few were ever produced in LHD. Our specialised classic car workshop has proven in the past over and over again, that we as specialists in this domaine can offer the right assistance to Aston Martin enthusiasts who like to get involved in such a restoration and follow-up this exciting project during the successive steps of the restoration. For sale in this condition at 80.000 euro
