Aston Martin DB4 SV Vantage

1963

Galerie

Chassis : DB4/1203/R Engine : 370/1207/SS Surely one of the most sought after Aston Martins, this series V is considered by many as one of the purest Aston Martin designs (in fact a pre DB5 series). Still in original colour configuration as when sold new in the UK in "Black Pearl" with red leather interior in 1963. Excellent presentation inside out with very attractive original leather trim. This much appreciated original Vantage specification DB4 engine was completely overhauled by well-reputed Belgian engine shop. After years of inactivity this very attractive DB4 waits for final assembly and preparation that could be executed to the new owners' specifications by our experienced classic car workshop. In conclusion: a very tempting Aston Martin at a nowadays cheap 215.000 euro with lots of future potential. Don't you agree?

Marque	Aston Martin
Modèle	DB4 SV Vantage
Année de construction	1963
Volant	Droite (RHD)
