Aston Martin V8 Coupé

1973

Galerie

This early V8 Aston Martin was bought by previous belgian owner in 1985 from the respected Aston Martin dealer, RS Williams. RS Williams carried out a full engine rebuild at 44.000 miles. In 1985, the car had 75.000 miles on the clock and now it reads 127.041 miles. It is true that the last few years, this car has not been driven at all... The usual problems due to the long immobilisation, had to be solved by our workshop before I could take the car out on the road again. Every time I drive this V8, she behaves better and better ! Bonhams will offer this car for sale at their Newport Pagnell sale on the 8th of May. The new owner will buy a structural very sound car only let down by a poor paint job. Brown leather interior is still superb. Mechanics are super but still need some final attention. A cheap step in the exclusive Aston world at an auction estimate of £10,000 GBP

Marque	Aston Martin
Modèle	V8 Coupé
Année de construction	1973
Volant	Droite (RHD)
