Austin Healey 100/4 'M'

1954

Galerie

Austin Healey's are available in all kinds of styles. The elegance of the 100/6 and MKI, the comfort of the MKIII, the sober appearance of British Racing Green with painted wire wheels, glamour look of chrome wire wheels and two-tone color combinations, or... the 'beast' morphology of this 100/4. In fact, this is how I prefer a Healey to be when I am in my sports-riding mood and want to go for a 'blast' with a constant grin on my face. I am in love with the 100/4 unspoiled original-concept lines and this particular car's sober appearance in black with dark red sides and black 72 spokes wire wheels fitted with Dunlop racing tyres. The more, our specialist workshop, which has over the years built-up quite some experience restoring and preparing Healeys, got the opportunity to rebuild the mechanics of this 100/4 for the previous owner, regardless of cost, in such a way that a maximum of performance and pleasure was obtained. We went for the 'M' or 'Le Mans' specification and even for a little bit more... Well, I can assure you this Healey is a 'beast' of a sportscar ! I am sure I am not the only one with such an idea about the Big Healey's. You too...? Well, come and have a look and let's go for a blast! "This original BN1, which was upgraded to BN2 specification by fitting the 4 speed gearbox + Overdrive, was initially sold to the USA, imported back to the UK and later into Belgium, comes with Belgian registration documents and a Heritage Certificate."

Marque	Austin Healey
Modèle	100/4 'M'
Année de construction	1954
