- SOLD -

Best driver-seat from the 50-ies ! 1958 LHD I just bought the best driver seat from the 50-ies! I can assure you that: - the seating position is just perfect. - the original leather wears some beautiful patina and feels (+ smells) very cosy. - the driver has more than enough space in lenght, width and height. - the view on the beautiful wallnut veneer dashboard with top-quality Smiths big black instruments is just the best view on a dashboard one can wish for. - the slim big black steering wheel falls perfectly into the drivers hands. The manipulation is effortless thanks to the factory power steering system. - the view through the sundimmed panoramic windscreen onto the long bonnet hiding the mighty 6-cylinder in line , gives the driver a sensation of power and security. Seated in this seat one would wish the road ahead never ends...! The last owner was for years and years perfectly happy in this driver-seat. Very meticullously he wrote down in a little notebook what trips he covered, for how many miles, when he fuelled-up, serviced her, etc... He enjoyed the pleasures of this driver-seat for 33 years! Wouldnt you continue to enjoy all the pleasures of this fabulous driver-seat? Oh yes, I almost forgot to tell you: It is an ex-Portugese extremely sound LHD Bentley SI from 1958, which is ready to go.

Marque	Bentley
