Invicta S-Type Low Chassis Corsica DHC

1933

Galerie

I am very proud to add this sensational Invicta to my stocklist. It is commonly known that S-Type Invicta's are on the top of many collectors' wish list. These quality sportscars combine the elegance of a Jaguar SS 100 with the power (in fact more power) of vintage Bentley's and the exclusivity of the most exotic quality sportscar manufacturers. During my 20 years career as a classic car dealer, I had the chance to own a little series of S-Type Invicta's. This chassis n° S140 is without any doubt the one I have the fondest memories from. Not only is it the 3rd time in 15 years that this Corsica DHC passes through my hands, but also my classic car workshop "Twin Cam" had the opportunity to carry out a nut & bolt restoration on this Invicta. Let me point out why I am so fond of this prewar super sportscar by listing for you the strong elements of this super rare top quality collectors car : -100% genuine & matching numbers S-Type low chassis with original & unique Corsica body (from the approx. 45 S-Type Invicta's in full running condition, this Corsica DHC is one of the very few which is still totally correct and matching numbers !). -Nut & bolt restoration by the world renowned Rod Jolley coachbuilding and ourselves preserving a max. of original material. -1st price at the Concorso d'Eleganza at the Villa d'Este in 2000 (where photo's shown on my website were taken) + many other awards. -participation at the historic Mille Miglia in 1992- 1992- 2004. A rare opportunity to acquire one of the only 78 produced S-Type Invicta's. I will offer this car for sale on my stand (F31) at the Retromobile show in Paris (16-25 Febr). Come and admire this beauty over there !

Marque	Invicta
