Jaguar E-type SI 3.8 FF Roadster

1962

Galerie

Jaguar E-type SI 3.8 Flat Floor Roadster 1962 LHD Matching numbers: Chassis n°: 875617 Engine n°: R 1877-9 I do not often get the chance to offer for sale a car which my workshop completely restored, but this Jaguar E-type is such a rare occasion. Usually my customers have been patient for 12 to 18 months before a complete restoration is finalised and in the meantime the desire to drive their car has grown on them, month after month. No way they would part with their new toy! With this early Flat Floor E-type it was exactly the same, except that at delivery of this Jaguar just after our summer holidays, my customer was paralysed by the beauty of his new toy and did not dare driving her...! After this nut and bolt restoration, only 61 km were covered! However my customer is sweating water and blood each time he drives his E-type, that much he is afraid he might get his Jaguar dirty or even worse, damage her...! In this case it is not at all exaggerated to claim that my classic car workshop knows every nut and bolt of this E-type, because we have started from a bare metal body, restored all the components (body, mechanics, electricity, chrome, trim, instruments, etc...) and reassembled the whole car again . We are used doing so, because we have certainly restored at least 10 Jaguar E-types during the 25 years we run our classic car workshop. Admire the photo taken in the derelict factory and admit... Yes, she is a stunning beauty! So, are you in to own a freshly restored Jaguar E-type Flat Floor Roadster and are you courageous enough to enjoy this beauty? Well you can! Tomorrow if you want...

Marque	Jaguar
Modèle	E-type SI 3.8 FF Roadster
Année de construction	1962
