Jaguar MK II 3,8L

1963

Galerie

I am really proud to present this super MKII here in my stocklist because we restored this car ourselves from top to bottom in my workshop approx. 6-7 years ago. This restoration was executed for the new owner regardless of cost (total budget ended up well above 100.000 euro. First I visited a couple of well reputed specialists in the UK to be able to decide with full background information on the modifications and specific preparations we would apply to this job. The very sound body shell was brought to bare metal and from this basis this MKII was nut & bolt rebuilt. Let me list you a few of the improvements which make this Jaguar MKII a much more usable and enjoyable everyday classic: -rack & pinion power steering -alternator - anti-roll bars -adjustable shock absorbers -coopercraft brakes for front & rear -electric Kenlow fan -oilcooler -full flow stainless steel exhaust - heat & sound proofing of passengers compartment -improved ventilation system -green tinted glass -heated rear window -inertia seat belts front & rear -central locking system -alarm -high quality full leather retrim -installation of headrests on original front seats preserving rear pick nick tables -slowly dimming interior light -addition of interval wiper movement -emergency indicators -halogene headlights -high quality hifi-system with CD-box in luggage compartment + amplifactor under passenger seat incorporating original fully restored Becker radio -etc... Finished in deep green metallic, with new wire wheels and Avon turbospeed tyres with around perfect chrome and perfectly fitted body gaskets, this Jaguar MKII has an absolutely stunning presentation. With only 2000 km on the clock after this comprehensive restoration, I can offer this beauty for sale at approx. half of the total cost. A unique chance for a demanding MKII enthusiast !
