JAGUAR

Jaguar XK140 DHC

1956

Galerie

Let me tell you this straight away : this is the best XK I have ever driven ! Totally restored some years ago but still in perfect nick, this XK shows now just that little bit of patina which makes her even more attractive. The black exterior body paint in combination with the tobacco brown leahter interior and black double duck hood, is a very attractive combination on this stylish XK140 DHC. What makes this XK so special is the mechanical set up ! The highly respected tuning company, FOREWARD ENGINEERING in England, fitted a superbly tuned 3.8 liter engine and transplanted 4 disc brakes from the XK150 on this 140. The huge, but smooth power from the engine, can now be stopped effectively by this improved braking system. I hope you feel it right now this beautiful XK is a superbly sorted "beast". To experience the full sensation, I can only suggest a test drive and I guarantee you will fall in love with this fantastic XK.

Marque	Jaguar
Modèle	XK140 DHC
Année de construction	1956
Volant	Droite (RHD)
