Lancia Artena Ministeriale

1941

Galerie

Unusual to list a car from the 2nd WW period here on this website. This practical Lancia Artena was developed on demand of "Il Duce" to transport people and goods. Based on the Astura chassis but powered by a more modest 4 cylinder typical V, 2,0 l engine. Very sound attractive estate body (mostly steel with exterior wood finish) nicely presented in original colour combination. Major part of interior trim on this 7-seater is still in charming original condition. This very unusual Lancia needs just a little bit of mechanical attention to brakes and fueltank (we can take care of this). Ideal for the classic car fanatic with a large family, having a couple of big dogs and regularly practising surf on the Atlantic coasts.

Marque	Lancia
Modèle	Artena Ministeriale
Année de construction	1941
Volant	Droite (RHD)
