Lancia Aurelia B24 Conv

1957

Galerie

Lancia Aurelia B24 Convertible 1957 LHD Chassis B24S 1424 is one of the 521 Aurelia convertibles produced by the Lancia factory. This stylish model is considered by many Italian supercar enthusiasts as being the most technically advanced open two-seater available in the 50-ies. A little bit more restrained in beauty than the "wilder" almost similar B24 'America' Spider, the B24 Convertible offers more comfort to driver and passenger, thanks to the comfortable seats, the perfect wind protection from panoramic windscreen + handy deflector windows and wind-up side windows, excellent accessibility and better weather protection from the easy to manipulate hood. Our specialist classic car workshop took care of a no expences spared, full restoration of this B24 Convertible respecting the original specifications, provided by the "Aurelia Registro". The result is, as you can see from the photographs attached, a tip-top condition Aurelia B24 Convertible from whatever angle you watch this style icon. As can be imagined, this B24 also drives just as if she came out of the Lancia factory. A real pleasure! We presented this Lancia Aurelia B24 to the Belgian "Contra'le Technique" as a normal car (not as an 'oldimer') and, as could be expected, the inspectors had only words of praise for this car.

Marque	Lancia
Modèle	Aurelia B24 Conv
