Lancia B20 SII

1953

Galerie

This car is back with us after a complicated part exchange deal with a french colleague and we are absolutely delighted to have this fantastic Aurelia back in stock. This IInd series Aurelia features a couple of nice period Nardi extra's such as the neat steering wheel and "flip-out" door handles. These Aurelia's were connoisseurs' cars, for instance, Prince Rainier of Monaco and Fangio, drove them. This Aurelia is incredibly modern to drive. Very homogene feeling on the road, neutral dynamics, crisp performances from its V6 2 litre engine, excellent seating position, etc...Nothing but superlatives ! Truly a revelation for a car from the fifties. The more the structural and cosmetic presentation are faultless. Still fitted with original rubber mats which are in good condition and which prove the car was well taken care of in its previous life. The upholstery was totally renewed respecting the originality and looks great ! The rear lights, which were after market "improvements" probably fitted in the 60ies (job well done), give this Aurelia a specific personality. A set of original rear lights and the original domed hub cups come with the car. In my opinion, a very under estimated classic which offers great value at only 40.000 Euro

Marque	Lancia
Modèle	B20 SII
Année de construction	1953
