Lancia Flaminia Super Sport Zagato

1965

Galerie

A chance not to be missed by the Marcello Mastroianni's amongst us! With only 150 Super Sport versions built by Zagato, this V6 2,8 L 3 carburettors variant is without any doubt the most sought after Flaminia. Zagato succeeded with this Super Sport in producing a well balanced and performant sportscar (150 HP and 210 km/h) on the top range Lancia Flaminia. Very advanced mechanical engineering, sexy double bubble aluminium coachwork and rareness : this Flaminia Super Sport has it all! This particular Flaminia is in excellent structural and mechanical condition. This Lancia sportscar still performs now as if she was new in 1965 ! Totally original apart from a respray in her original colour of "Newmarket Grigio" years ago. Because of her evident general qualities, this exotic Italian classic deserves absolutely a reconditioning job on the aluminium panels and a quality respray. The future "Marcello Mastroianni" will be rewarded with a top class Italian sportscar! For sale in her present condition at a tempting price.
