Lancia Aurelia B24S Spider America

1955

Galerij

I am proud to be able to present you another Lancia Aurelia B24S Spider America. As you surely know, only 240 were ever produced. Chassis B24S 1098 was produced in 1955 and, as most of the Spiders - hence the 'America' suffix - initially sold to the USA. This Lancia came back to Europe in the 80-ies and was completely restored by an Italian specialist. The full photographic file is available and shows clearly the professionalism of the restorer. Structurally still in excellent condition the paint finish has acquired over the years again a charming patina, making the car look in my eyes even more attractive. The last long term Italian owner used his Spider during many Lancia club events, even participating to big international gatherings as far as Argentina. I mention this just to make clear this B24S is in perfect, ready to use, and 100% reliable condition. A real drivers car! Over these years the last owner decided to fit to his Aurelia the very much sought after options such as the Nardi carburettor kit, original Borrani wire wheels and the stylish hard-top, turning this B24S into a top-specification Spider. Connoisseurs will agree with me that this Lancia B24S Spider represents an ultra-rare opportunity to acquire a top collectors sportscar from the 50-ies. Offered for sale at 400.000 euro, I know from my previous experiences with B24 Spiders that chassis n° 1098 will not be available for long!

Merk	Lancia
Model	Aurelia B24S Spider America
Bouwjaar	1955
